

Advanced Technology Beyond Bioquell, 100% Kill In A Third of The Time While Ending Green

Overview

A fair and balanced literature based analysis of the hld options:
ultrasonics, vhp, uv-c, wipes, sprayers

Benefits of Attending

The opportunity to participate in an evidence based discussion of a proven, technologically viable, solution to eliminate and not merely reduce pathogens in the hospital environment

The information and material presented and discussed, will enable your facility to enter the “end of the antibiotic era” with confidence.

Summary

- Implications of the “end of the antibiotic era”, it lasted 67 years
- PAA, a chemistry of beauty, 98% water
- Altacare... Safe, Food Grade, Organic chemistry
- Ultrasonics, the advantages... Why Altapure
- The AP-4 process...
- Features of the AP-4
- Hospital Utilization Practices and ROI
- A 100% kill in an entire space.... no reservoir of pathogens: no shadowing
- Definition of Disinfection....> 6logs in < 10 minutes
- UV-C hype or truth... what the peer reviewed literature says
- VHP, UV-C, WIPES, SPRAYERS
- Challenges....
